Barplot of Enriched GO Terms
cytoplasmic translation
T cell differentiation
regulation of T cell activation
lymphocyte differentiation
alpha−beta T cell activation
positive regulation of leukocyte cell−cell adhesion
leukocyte cell−cell adhesion
positive regulation of leukocyte activation
T cell selection
regulation of leukocyte cell−cell adhesion
cytosolic ribosome
ribosomal subunit
cytosolic large ribosomal subunit
ribosome
large ribosomal subunit
cytosolic small ribosomal subunit
small ribosomal subunit
focal adhesion
cell−substrate junction
external side of plasma membrane
structural constituent of ribosome
rRNA binding
cadherin binding
ubiquitin ligase inhibitor activity
ubiquitin−protein transferase inhibitor activity
signaling adaptor activity
T cell receptor binding
cytokine binding
phosphatase binding
signaling receptor complex adaptor activity
