Barplot of Enriched GO Terms
vacuole organization
regulation of innate immune response
positive regulation of response to biotic stimulus
positive regulation of innate immune response
innate immune response−activating signaling pathway
phagocytosis
activation of innate immune response
macroautophagy
small GTPase−mediated signal transduction
myeloid cell differentiation
vacuolar membrane
lysosomal membrane
lytic vacuole membrane
secretory granule membrane
ficolin−1−rich granule
tertiary granule
primary lysosome
azurophil granule
focal adhesion
cell−substrate junction
GTPase regulator activity
nucleoside−triphosphatase regulator activity
actin binding
phospholipid binding
cadherin binding
pattern recognition receptor activity
phosphatidylinositol binding
protein serine/threonine kinase activity
GTPase binding
Toll−like receptor binding
