Barplot of Enriched GO Terms
myeloid leukocyte activation
chemotaxis
taxis
phagocytosis
leukocyte chemotaxis
regulation of endocytosis
regulation of innate immune response
vacuole organization
cell chemotaxis
leukocyte migration
secretory granule membrane
ficolin−1−rich granule
tertiary granule
vacuolar membrane
primary lysosome
azurophil granule
lysosomal membrane
lytic vacuole membrane
secretory granule lumen
cytoplasmic vesicle lumen
GTPase regulator activity
nucleoside−triphosphatase regulator activity
pattern recognition receptor activity
GTPase activator activity
phospholipid binding
Toll−like receptor binding
immune receptor activity
actin binding
GTPase binding
small GTPase binding
