Barplot of Enriched GO Terms
cytoplasmic translation
T cell differentiation
ribosomal small subunit biogenesis
lymphocyte differentiation
T cell receptor signaling pathway
ribosome biogenesis
antigen receptor−mediated signaling pathway
immune response−activating cell surface receptor signaling pathway
immune response−regulating cell surface receptor signaling pathway
regulation of T cell activation
cytosolic ribosome
ribosomal subunit
ribosome
cytosolic small ribosomal subunit
cytosolic large ribosomal subunit
small ribosomal subunit
large ribosomal subunit
focal adhesion
small−subunit processome
cell−substrate junction
structural constituent of ribosome
rRNA binding
mRNA 5'−UTR binding
ubiquitin ligase inhibitor activity
ubiquitin−protein transferase inhibitor activity
MHC class I protein binding
