Barplot of Enriched GO Terms
B cell receptor signaling pathway
B cell activation
antigen receptor−mediated signaling pathway
immune response−regulating cell surface receptor signaling pathway
antigen processing and presentation of peptide antigen via MHC class II
immune response−activating cell surface receptor signaling pathway
antigen processing and presentation of peptide or polysaccharide antigen via MHC class II
MHC class II protein complex assembly
peptide antigen assembly with MHC class II protein complex
antigen processing and presentation of exogenous peptide antigen via MHC class II
MHC class II protein complex
MHC protein complex
trans−Golgi network
Golgi apparatus subcompartment
trans−Golgi network membrane
lumenal side of endoplasmic reticulum membrane
endocytic vesicle
external side of plasma membrane
late endosome membrane
ER to Golgi transport vesicle membrane
MHC class II protein complex binding
MHC protein complex binding
MHC class II receptor activity
peptide antigen binding
GTPase regulator activity
nucleoside−triphosphatase regulator activity
immune receptor activity
phosphatidylinositol binding
phospholipid binding
antigen binding
