Barplot of Enriched GO Terms
T cell receptor signaling pathway
antigen receptor−mediated signaling pathway
alpha−beta T cell activation
immune response−activating cell surface receptor signaling pathway
immune response−regulating cell surface receptor signaling pathway
T cell differentiation
lymphocyte differentiation
leukocyte mediated cytotoxicity
lymphocyte mediated immunity
regulation of T cell activation
external side of plasma membrane
immunological synapse
alpha−beta T cell receptor complex
T cell receptor complex
plasma membrane signaling receptor complex
recycling endosome membrane
MHC protein complex
coated vesicle membrane
recycling endosome
coated vesicle
T cell receptor binding
MHC protein binding
non−membrane spanning protein tyrosine kinase activity
MHC protein complex binding
coreceptor activity
MHC class I protein binding
protein tyrosine kinase activity
immune receptor activity
phospholipase activator activity
phosphotyrosine residue binding
