Barplot of Enriched GO Terms
leukocyte mediated immunity
leukocyte mediated cytotoxicity
natural killer cell mediated immunity
immune response−activating cell surface receptor signaling pathway
immune response−regulating cell surface receptor signaling pathway
alpha−beta T cell activation
natural killer cell mediated cytotoxicity
leukocyte cell−cell adhesion
regulation of leukocyte mediated immunity
cell killing
external side of plasma membrane
secretory granule membrane
immunological synapse
focal adhesion
specific granule membrane
cell−substrate junction
tertiary granule membrane
phagocytic vesicle
specific granule
cytolytic granule
immune receptor activity
MHC protein binding
MHC protein complex binding
GTPase activator activity
actin binding
non−membrane spanning protein tyrosine kinase activity
carbohydrate binding
GTPase regulator activity
nucleoside−triphosphatase regulator activity
protein tyrosine kinase activity
